SAFETY

Installation.

Unless otherwise stated TSL equipment may be installed at any angle or position within an operating temperature range of 5° - 30° C .

All TSL equipment conforms to the EC Low Voltage Directive:

EC Low Voltage Directive (73/23/EEC)(OJ L76 26.3.73)(LVD). Amendment: (93/68/EEC) (OJ L220 30.8.93).

In all cases, the frame of the equipment must be earthed on installation.

The earth pin on the IEC mains inlet connector is connected to the metal frame of the equipment, to 0 volts on the internal DC PSU and to signal ground, unless otherwise stated. All metal panels are bonded together.

Due consideration for cooling requirements must be given when mounting the equipment. Ideally 1RU of rack space should be left above and below the unit.

Check that the fuse rating is correct for the local power (mains) supply. Replacement fuses must be of the same rating and type for continued protection against fire risk.

Do not switch on until all connections are made.

WARRANTY, MAINTENANCE AND REPAIR

All TSL equipment is guaranteed for one year from the date of delivery to the customer's premises. If the equipment is to be stored for a significant period, please contact TSL concerning a possible extended warranty period.

Failure during warranty

If any TSL product should fail or become faulty within the warranty period, first please check the PSU fuses.

All maintenance work must be carried out by trained and competent personnel.

TSL Returns Procedure

Please telephone +44 (0)1628 676200 (Fax: +44 (0)1682 676299) and ask for Sales who will provide a Returns Number. This will enable us to track the unit effectively and will provide some information prior to the unit arriving.

For each item, this unique Returns Number must be included with the Fault Report sent with the unit.

A contact name and telephone number are also required with the Fault Report sent with the unit.

Fault report details required.

- Symptoms of the fault (to include switch setting positions, input signals etc):

Packing

Please ensure that the unit is well packed as all mechanical damage is chargeable. TSL recommends that you insure your equipment for transit damage.

The original packaging, when available, should always be used when returning equipment.

If returned equipment is received in a damaged condition, the damage should be reported both to TSL and the carrier immediately.

AMU2-2BHD AUDIO MONITORING UNIT

1.0 Introduction

The AMU2-2BHD is a full rack, 2RU x 280mm deep Audio Monitoring Unit with two TSL Bargraphs.

The following features are standard:

- Two TSL bargraphs.
- One switch selectable quad analogue input.
- Two pairs of AES/EBU inputs.
- One HD/SDV auto sensing input.
- Audio-present indication.
- Phase reverse switch.
- Out-of-phase error indication.
- Re clocked output of either HD or SDV
- Decoded PAL/NTSC composite
- Optional additive output switch selection.
- Additional SDV output if SDV is used on input
- Headphone outputs with LS muting.
- Fixed and variable stereo line outputs.

2.0 Front Panel Controls

2.1 Input and Meter Selection Buttons

Analogue Input Quad analogue I/P. A1 (Channel 1) is fed to the top bargraph and A2 (Channel 2) is fed to the bottom bargraph of the upper display. A3 (Channel 3) is fed to the top bargraph and A4 (Channel 4) is fed to the bottom bargraph of the lower display.

AES1,2,3&4 Selects one of four AES pairs to the bargraphs. When AES 1 is selected inputs 1 & 2 are displayed on the bargraphs and when AES2 is selected inputs 3 & 4 are displayed.

S/HD Selects A1/A2 or A3/A4 from the de-embedded SDV to the bargraph.

Group Select Toggles to decode the required group within the embedded audio signal.

Letterbox Shows the composite output as 16:9 aspect ratio. (HD only)

Ø Rev (Function) Momentary phase reverse between A1 and A2. N.B. This functions on the variable and loudspeaker outputs only and not on the meters.

Bargraph Features

Alpha numeric display To turn this display on the bargraph on press phase reverse and S/HD1 pr1 buttons.

Brightness To increase the brightness of the bargraph display Press phase reverse and A1L. To decrease the Brightness press phase reverse and A2L.

Reference Marker To turn the reverence marker on and off press phase Reverse and the CUT button.

2.2 Output Switching

A1/A2

These buttons select either:

- the Analogue Left or Right signals of the metered Input,
- the AES/EBU Input 1 Left or Right signals or
- the selected SDV group A1 & A2 decoded outputs to the Left or Right Output Channels.

The buttons toggle. Additive mixing is possible if two or more buttons are selected together.

A3/A4

These buttons select either:

- Analogue Left or Right I/P 8 signals,
- the AES/EBU Left or Right signals of Input 2 or,
- the selected SDV group A3 & A4 decoded outputs to the Left or Right Output Channels.

The buttons toggle. Additive mixing is possible if two or more buttons are selected together.

DIM

Approximately 16dB of attenuation is switched into the audio path

CUT/MUTE

The front panel button **CUT**(s) the signal to all O/Ps.

Remote Mute of either or both of the LS O/Ps and Variable Line O/Ps are possible via a rear connector. A ground is required on the appropriate pin to activate the **MUTE** condition.

VOLUME

The Headphones O/P and the Variable Line O/P may be varied.

0 dBu = 0.775V rms = PPM 4.

Nominally, -18 dB ref 0FS = 0 dBu output.

European line up: -18 dBu

American lineup: -20 dBu

All audio monitoring Calibration procedures are factory Set.

5.1 Please note that some American equipment has the function of the XLR pins 2 & 3 reversed.

TSL product is wired to the European standard
