TSL At BroadcastAsia 2008

Showcasing at BroadcastAsia 2008:

NEW 3GB/s V Series audio video monitor (AVMU2-3G):

The new 3G V is TSL's latest audio video monitor capable of decoding all standards up to and including 1080p 50Hz. Features include precision HD/SDI audio metering with an integrated 4.75 inch, 16.9 LCD screen to provide an efficient audio and video monitoring solution for professional broadcast facilities.

NEW Monitor Plus audio family – Four rack mount confidence monitors with passive, active, analogue and AES digital options. This new range from TSL has been designed to deliver outstanding sound quality at a price that will suit the wider broadcast market.

NEW Power Manager Mains Distribution Units (MDU Series): Intelligent power distribution from TSL comes in the form of the award-winning Power Manager MDU series. The MDU Series includes four units:

Power Manager - Premium intelligent power distribution with Ethernet SNMP alarms, e-mail alerts and latching relays

Power Alert - Intelligent power distribution with Ethernet SNMP alarms

Power Change Over – Dual input auto changeover and 14 way fused outlets

Power Standard - Reliable 14 way mains distribution at excellent value
