

# TSL pens tender deal with Peel Media Studios

Systems integrator TSL has struck a deal with Peel Media Studios to put out to tender contracts to supply equipment to the studio technical block at MediaCityUK.

TSL is currently overseeing the installation for phase 1 of the Salford development, but this additional agreement includes the responsibility for buying all broadcast equipment.

Technology will be chosen via a detailed tendering process.

TSL managing director David Phillips said: "Initial pre-building of the system is already under way and we shall be following a detailed timeline to ensure completion in 2010, as scheduled."

Meanwhile, Peel Media has bought two Vista audio consoles for radio studios at MediaCityUK

from German manufacturer Studer. One will be used in the recording hall for the BBC Philharmonic Orchestra, and the other will be installed in a multi-purpose audio suite for productions that need a large studio, such as radio drama.

Peel Media has launched a website ([www.mediacityuk.co.uk](http://www.mediacityuk.co.uk)) and film ([www.youtube.com/officialmediacityuk](http://www.youtube.com/officialmediacityuk)) about life at MediaCityUK.
