

CSI Awards 2010

Winners announcement

CSI is delighted to announce the winners of its 8th annual awards.

The full list of winners can be found below. In addition, for the first time this year, a Highly Commended award has been introduced and given out in small number of categories as a mark of recognition where there was very little to separate the top two solutions. These are also noted below in brackets.

The awards were celebrated and presented at our ceremony at the IBC show. They were given to those companies that showed a combination of technical innovation and existing or potential market impact with their solutions. The awards are judged by an independent and expert panel of judges.

Congratulations to all this year's winners in what has been another highly competitive turnout and a huge thanks to all for entering!

1. Best outside broadcast technology or service

TSL Professional Products Group - PAM2-3G16
