

Internet Based Clipping - IABM - 25th July 2011

TSL Professional Products Group (TSL PPG) designs, manufactures and sells worldwide a unique range of TSL-branded products. Two new products will be launched at IBC this year - the AVM-T-MIX and the PAM1-3G16.

NEW: AVM-T-MIX

TSL PPG, the company who first brought you OLED-based audio monitoring, launches at IBC the AVM-T-MIX, the world's first rack mount Touchscreen controlled audio mixer/monitor. The Touch-Mix system delivers a unique combination of audio monitoring and channel mixing capabilities designed to simplify operations and workflow throughout the Television broadcast environment. In live operation, the T-MIX user can instantly see channel activity, recognise the source that has been named via the QWERTY keyboard menu and listen to the resulting audio from individual, grouped or mixed channels. Surround sound audio can be down-mixed instantly at the touch of a button for compliance checking or for confidence monitoring and multiple language, or International mixes defined in seconds for instant recall.

NEW: PAM1-3G16

The natural evolution of the PAM1-3G8, this new addition to the PAM product family combines the size and convenience of the original 1RU multichannel audio monitoring unit with a full 16 bargraph display and many of the advanced features of the multi-award winning PAM2-3G16, such as loudness measurement, preset standard switching and advance monitoring mode selection.
