

TSL Professional Products BVE 2012 Preview

Visit

TSL at Stand H26 Visit TSL at Stand H26

TSL Professional Products will showcase their class leading products that are used in broadcast installations worldwide.

Aimed at creative positions the AVM-T-MIX is a unique concept in audio management and monitoring in 2RU. Normally reserved for monitoring and measurement devices, this BBC-inspired product adds a dual level, 10 channel digitally assignable mixer and up to 64 audio inputs can be chosen simultaneously from SDI, AES and analogue sources. As part of its move to MediaCityUK, Salford Quays, BBC Sport is standardising on the new AVM-T-MIX as the audio monitoring solution for TV Production which will help to streamline the workflow of flagship productions such as Football Focus, Final Score and Match of the Day.

Tallyman Virtual Control Panel is designed to provide multi-router control, improved workflow, remote access and alarm monitoring. It is easily configured and expanded and a valuable addition to the Tallyman family.

PsiMon is an SQL server-based, advanced power management system with a unique dashboard display providing comprehensive alarm, control and energy monitoring of all TSL's intelligent PDU products.
