

TSL Highlights Monitoring Tools

TSL is set to show off several new monitoring additions to its product line, including the PAM1-3G8, which is a compact multichannel and Dolby D&E audio monitoring product. It provides comprehensive monitoring for 5.1 discrete surround audio or Dolby-encoded signals from either AES/EBU sources or encoded HD-SDI video. It features eight bargraph level indicators, display of Dolby metadata, built-in monitor speakers, stereo downmixing capability and more.

TSL also is showing its AVMU2-3G premium audio and video monitoring unit that features a 2.5-inch high-resolution LCD TFT display screen, four discrete 53-segment bar graph indicators and loudspeaker monitoring.

Also check out TSL's line of under monitor displays and tally system.
