

PAM1-3G8 Wins Award For TSL At NAB

The NAB Show in Las Vegas played host to the North American launch of TSL's groundbreaking multichannel audio/video monitoring product, PAM1-3G8.

Shipping worldwide since February 2009, the PAM1-3G8 is the world's most comprehensively equipped and compact 1RU rack mount audio monitoring unit.

The combination of dual OLED displays, video confidence monitoring, intuitive menu structure, HiFi quality audio and instantly recallable user presets earned PAM1-3G8 a prestigious TV Technology Star 2009 Award for Superior Technical Achievement.

Commenting on the NAB Show and the TV Technology award, TSL Professional Products Group General Manager Chris Exelby said, "We are delighted that our professional audio monitoring products are being recognised for their world-leading excellence, not only by objective industry experts, but by major broadcast customers worldwide." He added, "Despite the global economic climate, this year's NAB was one of our most successful shows ever. The stand was constantly busy throughout the week and we

AVAILABLE NOW!

were inundated with enquiries about the new products."

With video confidence monitoring available as a zero cost upgrade to existing users, ITU-R BS.1770-1 loudness monitoring, Stereo Downmix

and Dolby DRC to be added to the PAM1-3G8 feature set within the next few months, PAM1-3G8 looks to set the standard in Multichannel Broadcast Audio Monitoring.

TSL Audio Applications Manager, Martin Dyster explains, "by drawing on the 22 years worldwide experience of TSL Systems, TSL Professional Products Group is continually reacting to and anticipating customer needs. PAM1-3G8 represents an investment in a future proof upgradeable platform which will adapt to your needs for many years to come".
