

# TSL ensures audio quality for 2010 World Cup South Africa

With only weeks to go until the world's most widely viewed sporting event gets underway, TSL Professional Product Group has announced the sale of a dozen of its PAM1-3G8 professional audio monitors to Alfacam, provider of OB facilities for Host Broadcasting Services (HBS) coverage of the 2010 FIFA World Cup South Africa.

The PAM1-3G8 will be used in broadcast compounds in Durban, Port Elizabeth, Johannesburg/Ellis Park and Pretoria stadiums to vastly simplify multichannel broadcast audio monitoring for the World Cup matches.
