

## Internet Based Clipping – TV Technology - 8<sup>th</sup> April 2010

### **TSLs Award-Winning PAM2-3G16 Offers Intuitive Monitoring**

At NAB Show 2010, TSL Professional Product Group is featuring the Royal Television Society Technology Innovation Award-winning PAM2-3G16, a professional, multi-standard, multi-format audio monitor that now includes Dolby® Digital Plus as well as much-anticipated ITU-R BS.1770 loudness measurement capabilities.

The PAM2-3G16's flexibility in terms of user-selectable scales, ballistics, range of standard input/output signals supported and the ability to intelligently dissect and monitor any multichannel audio signal structure make PAM2-3G16 the most advanced and intuitive product in its sector.

TSL power management features cost savings and a greener footprint with the MDU12-PMi, an energy management solution that provides total control over and visibility of equipment racks regardless of location. With its remotely switchable outputs, it will play a central role in system management and conservation of energy in major new broadcast installations.
