

**TSL PROFESSIONAL PRODUCTS GROUP APPOINTS TONY ORME AS PRODUCT DEVELOPMENT MANAGER**

TSL Professional Products Group today announced the appointment of Tony Orme as Product Development Manager with overall responsibility for the development of the Group's audio monitoring, UMD and Tally, power management and customised product families.

Orme is a highly experienced engineer with extensive knowledge of broadcast systems and technology based on work done as a broadcast engineer, project manager and R&D engineer for the BBC, MTV, BSkyB, Central, Meridian and GMTV amongst others.

TSL Professional Products Group General Manager Chris Exelby said, "Tony brings to TSL extensive broadcast infrastructure and workflow knowledge plus software and hardware design experience. His comprehensive skill set strengthens our ability to develop new and more integrated system solutions to better match market demands."

Orme said, "TSL products have already gained wide acceptance throughout the broadcast world and their popularity increases daily. However, I believe there is even greater scope to turn existing and soon-to-be-developed products into truly world-class market leaders."
