TSL AWARDED HD OB CONTRACT BY ARAB RADIO AND TELEVISION NETWORK

TSL has today announced that it has been awarded a major contract by one of the Middle East's leading broadcasters, Arab Radio and Television Network (ART). TSL will supply two fully equipped HD Outside Broadcast (OB) trucks and two associated trailers to a robust technical specification.

The new HD OB units and trailers, which are being built by Spectra Specialist Engineering in Westbury, UK, are 13.5m in length with expanding sides. The trucks, which will be delivered to TSL for technical installation, will each be equipped for up to 20 HD cameras and will initially be configured with 6 channels of EVS XT2, four VTRs, Grass Valley Kayak HD vision switcher and a Studer Vista 5 digital audio console. The integrated trailer system will feature dual redundant generators.

ART, based in Amman, Jordan, is well known for its exclusive sports broadcasts. These new HD OB trucks, built by TSL follow ART's announcement that it has been awarded the rights to broadcast the 2007/2008 Saudi Football League in HD to viewers across the world. The contract was awarded to TSL following a stringent tender process that enabled the company to demonstrate its expertise and experience on a wide range of projects in both HD and SD.
